

# Afeez Lawal

## Senior Software Engineer (Full-Stack Developer)

Lagos, Nigeria · Open to remote roles and relocation

afeezlg@gmail.com · +2348162302855 · afeezlawal.com · github.com/AfeezGL · linkedin.com/in/afeezgl

## SUMMARY

Full-stack engineer with 5+ years of building web products end to end, mostly in TypeScript. I use React and Next.js on the frontend, and Node.js with NestJS and Express, or Django, on the backend. I am one of the founding engineers at Sphera, a football manager game where I work across the mobile-first PWA and the NestJS backend, and players have completed more than 20,000 matches. At SomaEdge I build the React ordering and admin apps against a FastAPI backend, including real-time chat over WebSockets.

## SKILLS

- **Languages:** TypeScript, JavaScript, Python
- **Frontend:** React, Next.js, Preact, Vue.js, Tailwind CSS, TanStack Query, Zustand, Apollo Client, PWAs
- **Backend:** Node.js, NestJS, Express, Django, Graphene, GraphQL, REST APIs, WebSockets, OpenAPI
- **Tooling and mobile:** Docker, Git, Linux, Webpack, Rollup, Vitest, MSW, npm publishing, React Native

## EXPERIENCE

### Senior Software Engineer, SomaEdge LLC

Dallas, TX (Remote) · Feb 2025 to Present

- Built the guest ordering app in React, TypeScript and Tailwind CSS, with QR seat entry and real-time chat with an AI waiter over WebSockets. It reconnects automatically and queues messages, so orders go through on weak restaurant Wi-Fi.
- Built the kitchen display system and the internal admin console for tenants, staff, token usage and audit logs, with TanStack Query, Microsoft Entra ID sign-in and an API client typed from the backend's OpenAPI schema.
- Worked with the backend team on the design of their FastAPI and MongoDB services, including guest session flow, multi-tenant data isolation and the API contracts between the frontends and the backend.

### Founding Engineer, Sphera Gaming Studios

Lagos, Nigeria (Remote) · Dec 2024 to Present

- One of the founding engineers of Sphera, a mobile-first PWA football manager game. Players have completed 20,000+ matches across friendly, league and cup competitions.
- Work across the React and TypeScript frontend and the NestJS and Express backend and its REST APIs.
- Helped move Sphera from prototype to v2, which brought a new match engine, a redesigned UI and smoother gameplay.
- Built and deployed push notifications for match updates and competition reminders.
- Work with the founders on feature design, UX and technical architecture, and helped bring in the first players.

### Senior Software Engineer, Integraflow

Lagos, Nigeria (Remote) · May 2023 to Dec 2024

- Led development of the survey management dashboard in React, Next.js, Zustand and Apollo GraphQL, running on a Django backend.
- Built the Integraflow Web SDK in Preact and TypeScript and published it on npm.
- Built the SDK's queueing, batching and retry logic, so survey responses are not lost on flaky connections and the backend gets fewer, larger requests.
- Built the survey studio's preview panel, which shows a survey live at different device sizes while it is being edited.
- Set up the CI/CD pipeline for internal and public SDK builds. It roughly halved SDK deploy time and automated publishing to npm.

### Software Engineer, Kophy Technologies

Lagos, Nigeria (Remote) · Jan 2021 to May 2023

- Built Spektre Task, a bilingual English and German project management app for a door manufacturer, with Django and JavaScript. Built its REST APIs, documented them in Postman, and built its authentication, employee work-hours system and file storage and communication integrations.
- Worked in a team of 7 engineers on a comments feature for Omnidots, a vibration and air quality monitoring platform. Built its GraphQL APIs with Django and Graphene, and added translations with Lokalise and Django i18n.

## CERTIFICATIONS AND EDUCATION

- IBM Build RAG Applications: Get Started Certificate, Aug 2026
- IBM Develop Generative AI Applications: Get Started Certification, Oct 2025
- Front End Development Libraries Developer Certification, Jan 2022
- B.Tech, Urban and Regional Planning, Federal University of Technology, Akure, Jul 2023
